

Gable Top with Handle & Greenleaf Overlap Lock

This style clear folding box features a gable top with an overlapping greenleaf top closure. The triangular side creases fold in, to form a gable top. This design features a handle in the back of the top panel integrated with the overlap panel. The two tabs of the greenleaf overlapping lock are inserted into the aperture on the back panel for a strong and secure lock. Shown with greenleaf lock bottom or works with other bottom closure types.
