

## How to measure a box:

How to dimension a box correctly? Always make sure that the opening is at the top and bottom for measuring (even if that is not how it will display). That way you know where **A x B x C** are in relation to the opening. Measure from left to right to get **A**. Then measure from front to back to get **B**. Then measure from the top to the bottom to get **C** dimension.

A x B x C Open End is always at the top for measuring Тор 🗕 В Front Panel **Back Panel** Bottom Back Fron **Montreal Location:** Long Island Location: **Ontario Location:**
